

## Pupils' Worksheet A2

### Drama: An Uncertain Future

Name: \_\_\_\_\_

Class: \_\_\_\_\_

Working in groups of three or four, write a short play about either:

A. How the world will be in 100 years if we carry on using lots of resources and burying most of our waste. Think about what people in the future might have to go without if some resources run out. You could also think about what it would be like to live in a world where most of the land is taken up by rubbish tips. Each person in your group should have a character (either human or non-human) so that you can act out your play to the rest of the class.

Or

B. How the world will be in 100 years if everyone reduces, reuses and recycles as much as possible from tomorrow. Think about how much cleaner and prettier the world would be if less rubbish is put into the ground and fewer resources are used. Each person in the group should have a character (either human or non-human) so that you can act out your play to the rest of the class.
