

Pupils' Worksheet B3

Data Handling

It is often easier to show the results of data through using a bar chart or a pie chart.

Activity

Looking at the results that you collected from the meter reading activity (worksheet B2), decide whether it would be more informative to produce a bar chart or a pie chart.

1. Circle the type of chart that you would use:

Pie chart

Bar chart

2. Explain why you chose this type of chart.

3. Using the Excel program on the computer produce the chosen chart from the data obtained in the meter reading activity.
