

Pupils' Worksheet F1

1. Investigation Survey

Use the table below to look at where your clothes or pencil cases or anything in the room have been made and what they are made from. Then have a think about whether these materials are grown in the UK.

Item and what is it made from?	Where are they made?	Can you get the materials in the UK?

Now draw a Bar Chart to show where all the different items have come from, to show the most common places of manufacture.
