

Pupils' Worksheet H2

As you can see from the posters, there are important things that you need to think about when designing a poster. Think of a poster that you would like to design and follow the tips below;

USE BIG LETTERS! Make your letters large and clear so that they can be read from across a room.

Who is your audience?

Think about who will be looking at your poster. For example, if younger children are reading your poster you may have to use easier words and more pictures.

What is your message?

Is there something that you would like people to do? Make sure that this is clear.

Make it interesting. Make sure that people want to look at your poster and find out more. Use pictures and bright colours.
